

USDA climate-smart grant: An overview of DFA's selected project

Kristen Coady
Senior Vice President,
Chief Communications Officer

DFA's sustainability pillars

OUR PEOPLE

We put our people first, on and off the farm. We want all of our employees and farmers to thrive, which is why we provide a safe place to work and support positive workplace culture.

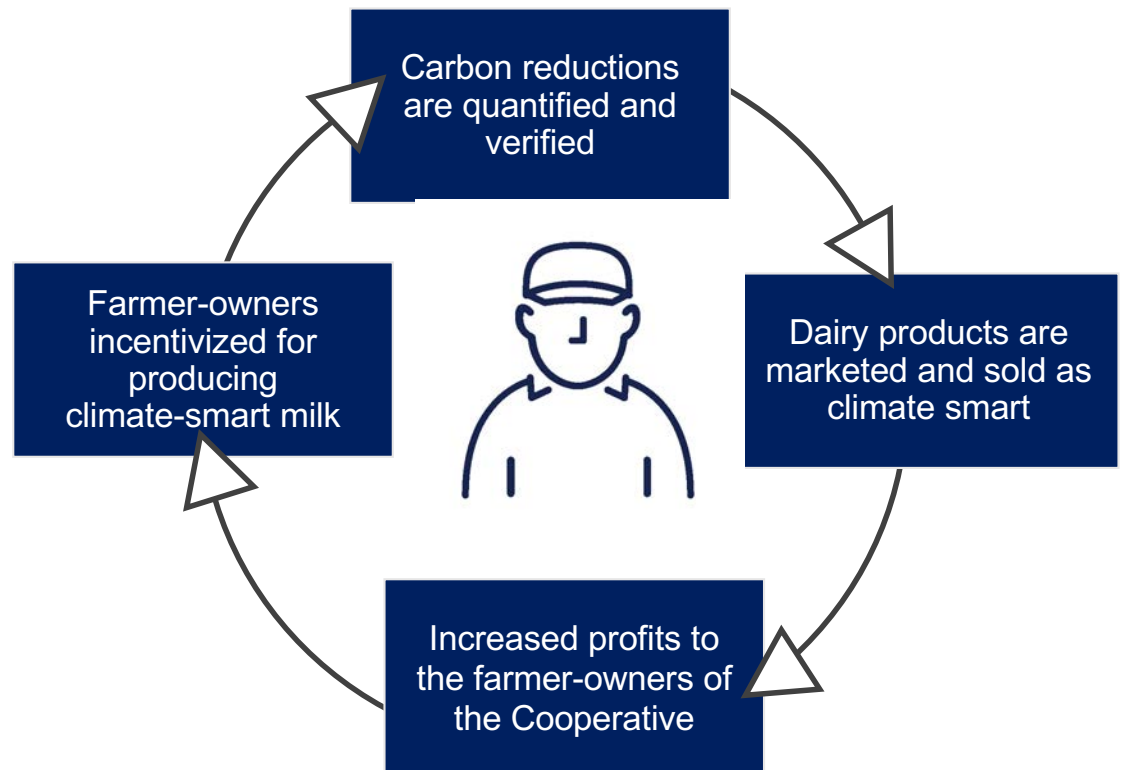

OUR PLANET

The success of our business – today and for future generations – relies on the health and well-being of our farmers' cows and the environment.

OUR COMMUNITIES

We enrich our communities with the nutritional goodness of dairy, by providing a direct connection to where their food comes from and through ongoing community service efforts.

**Project will
directly connect
on-farm
greenhouse gas
(GHG) reductions
with the
development of
climate-smart
dairy products**

Holistic approach to climate-smart practices

**Accelerate
regenerative
agriculture adoption**

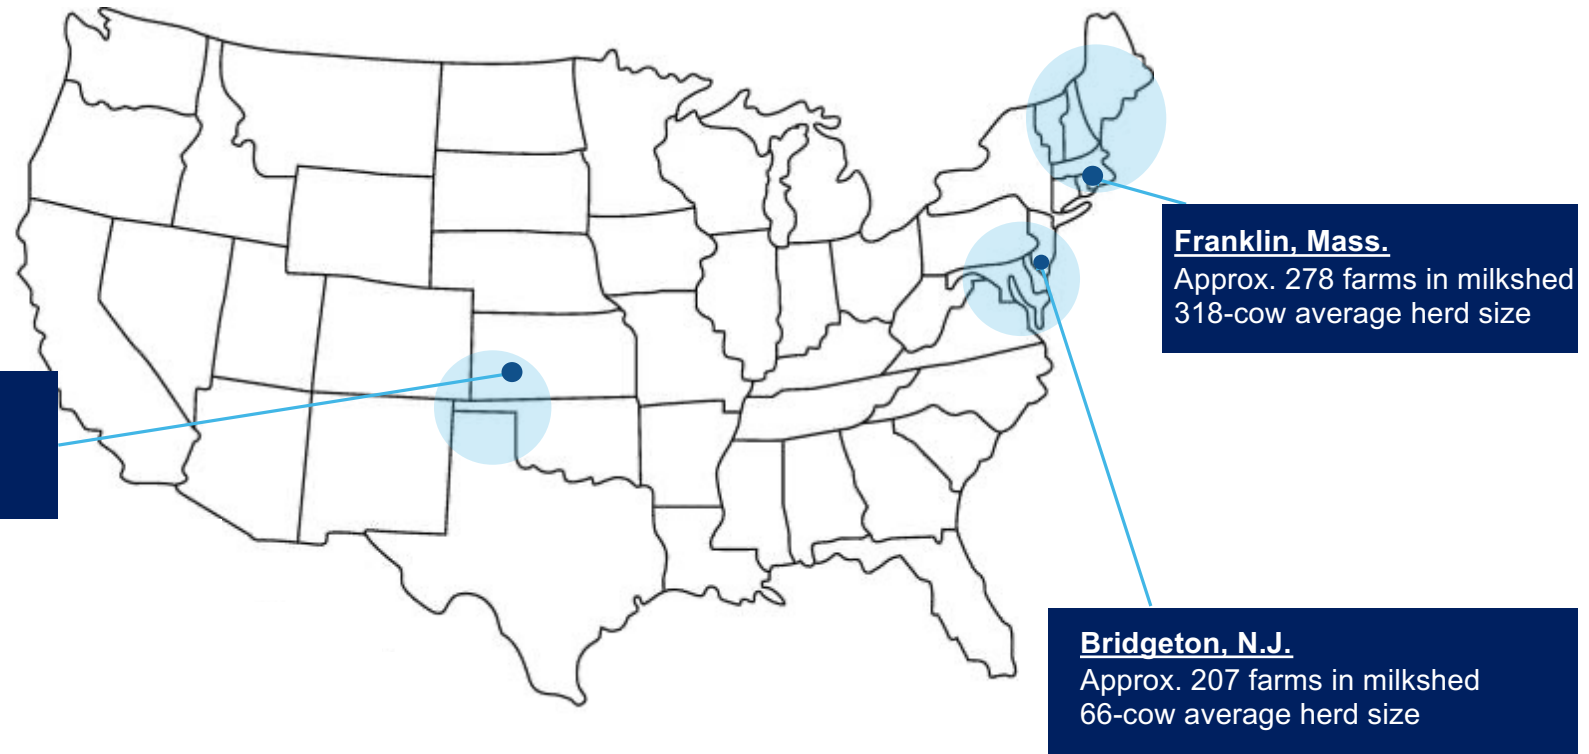

**Reduce enteric
methane emissions**

**Optimize manure
management**

Pilot program: farm to climate-smart product

TOTAL PILOT PROJECT GOAL
230 farms | 140,000 cows | Nearly 300,000 acres of farmland

Pilot program: farm to climate-smart product

Garden City, Kan.
Milk powders and cream

Franklin, Mass.
Garelick Farms fluid milk

Bridgeton, N.J.
Extended shelf life value-added milk

TOTAL PILOT PROJECT GOAL

230 farms | 140,000 cows | Nearly 300,000 acres of farmland

Thank you
